

Showtec Galactic Beam Laser (16a) C/w Half Coupler

£10.00 (Per Period)

Product Includes
1 x Half Coupler

Product Description

Want to create great beam shows and control your single laser beam by DMX. The Galactic beam makes it happen. It is equipped with a strong 40mW green Fat-Beam laser which projects a strong and solid beam. By using fat-beam technology we are able to use 40mW laser and still be compliance to IEC-60825. The beam is fully controllable by DMX. Especially when using multiple units together you can make a great and cost effective beam-show.

Attention, the laser only works when the interlock connector is connected with a remote interlock (ordercode 51316). You can test if the laser works properly with the included test connector. If you use the laser in public area's a remote interlock is necessary for safety regulations.
